TESTIMONIAL

"Henry is someone you want on your team. He is smart and talented and when a problem is set before him he is resourceful and can figure it out. I have admired and appreciated his work ethic and the care and crafting when it came to his projects. He chose projects that challenged his abilities, so that he could learn and grow. This is the kind of person you want to have working for you, especially due to his calm and patient demeanor.

Trish Ladd,
Platt College San Diego
Web Faculty

ABOUT ME

I am a creative designer that looks for creative ways to solve visual problems. I have 10 years of real-world experience in both graphic and web design fields. My skill proficiencies include brand identity, graphic design, UI / UX, web development, responsive design and WordPress theme development. My current highlight is filling in as dev ops with my last agency and learned how to maintain a web server successfully within a week. My goal is to innovate the way people see and use information on any medium.
